EVAPCO for LIFE

EVAPCO is more than a name. We are the global innovator in heat transfer solutions for the Commercial HVAC, Industrial Refrigeration, Power and Industrial Process markets. We pledge to make everyday life easier, more comfortable, more reliable and more sustainable for people everywhere.

OUR COMMITMENT

We never stop innovating. We set out to find groundbreaking solutions that transform the way the world works for the better. It's why we have more than 300 active patents worldwide. We also guarantee performance and put every solution through rigorous research and testing to ensure maximum efficiency and reliability.

PROTECTING THE ENVIRONMENT

Innovation and environmental sustainability go hand-in-hand at EVAPCO. Our industrial heat transfer equipment not only conserves natural resources and helps reduce noise pollution, but also features recycled steel content in construction. Our stainless steel units are constructed of panels that contain up to 75% of recycled content and our galvanized units contain over 80%. From sound reduction to water conservation to chemical elimination, we are developing new technologies that deliver ultimate operating advantages to our clients while protecting the planet for every generation to come.

Welcome to EVAPCO...

We are pleased to offer a full spectrum of heat transfer product solutions from 100 percent evaporative to 100 percent dry. These products are available in a wide range of sizes from the smallest factory assembled units to the largest field-erected products ... all available on a worldwide basis. We are quite proud of our full spectrum of global product solutions!

As a respected leader in evaporative cooling technologies, our commitment to Research and Development has led to innovative solutions for our constantly changing world. Solutions that are energy efficient, conserve water, and comply with local regulations.

But that isn't only what makes EVAPCO stand out above the rest. What sets EVAPCO apart from other manufacturers in the Commercial HVAC, Industrial Refrigeration, Power Generation and Industrial Process markets all points back to our team, the EVAPCO family, of which you are a vital part.

EVAPCO associates are fiercely loyal to each other, to our representatives and, most importantly, to the people they serve. We recognize that our customers are at the center of our success and we never take for granted the level of trust that you put in us when it comes to your heat transfer needs.

We demand excellence in everything that we do and we are committed to delivering the highest quality services and products. We're here to make your job easier, to be your partner, and to exceed your expectations.

EVAPCO for Life sums up our commitment. It is our promise that we will always provide you with the most innovative and most reliable products, created and built by the best people in the industry. By choosing EVAPCO, you're letting us know that we're doing the best job possible for you.

We thank you, not only for your business, but for inspiring our message. By working together with you, EVAPCO has been able to consistently breed a level of innovation, craftsmanship, and professionalism that our competitors find difficult to match! We couldn't do it without you!

Very sincerely yours,

A handwritten signature in black ink that reads "William G. Bartley". The signature is written in a cursive style with a large, stylized "B" at the end.

William G. Bartley
President and CEO

FULL SPECTRUM GLOBAL SOLUTIONS

EVAPCO provides a full spectrum of global product solutions for the Commercial HVAC, Industrial Refrigeration, Power Generation and Industrial Process markets.

From the smallest factory assembled cooling tower to the largest field erected air-cooled steam condenser, we offer heat transfer products designed to meet the water and energy requirements for any project. We are committed to providing solutions that are energy efficient and conserve water.

Our latest heat transfer solutions are the factory-assembled eco-Air Series of Dry Coolers, Air Cooled Condensers and Adiabatic Coolers and Condensers. The eco-Air Series completes our successful eco-family of closed circuit coolers and condensers with water-saving dry and adiabatic technology.

As an industry leader in third-party performance certifications, our fully-rated products enable you to operate your cooling systems efficiently and with complete peace of mind.

EVAPCO Air Solutions V Series, Germany

CLOSED CIRCUIT COOLERS

Dry & Adiabatic

Available in a wide range of footprints, motor types, control options and capacities, this complete line of Air Cooled/Dry & Adiabatic products offers maximum water savings, reduced maintenance, and simplified operation.

eco-Air Flat Dry Cooler
Flat Air Cooled Fluid Cooler

eco-Air V Dry Cooler
Air Cooled V Fluid Cooler

eco-Air V Adiabatic Cooler
Air Cooled V Fluid Cooler with Adiabatic Pads

eco-Air V Spray Cooler
Air Cooled V Fluid Cooler with Adiabatic Spray System

eco-Air Double Stack Dry Cooler
Air Cooled High Capacity Fluid Cooler

eco-Air Double Stack Adiabatic Cooler
Air Cooled High Capacity Fluid Cooler with Adiabatic Pads

Factory Assembled Induced Draft

Closed Circuit Coolers provide incredible cooling efficiency. Easier to maintain than open system cooling towers, EVAPCO's closed circuit coolers are an excellent option for any cooling system.

eco-ATWB
Water-Conserving Advanced Technology with Increased Dry Cooling Capacity

eco-ATWB-H
Hybrid Cooler Providing a Combination of Water & Energy Savings with the Highest Dry Bulb Switch Point

ESW4
Ideal for wet cooling applications where thermal and energy efficiency is of utmost concern.

ATWB
The original Advanced Technology provides an induced-draft, axial fan solution for a wide array of cooling applications. Also available in 7' wide containerized boxes.

Factory Assembled Forced Draft

The LSWE and LRWB are the industry standard in low-sound, centrifugal fan, forced-draft closed circuit coolers.

LSWE
Low Sound
Centrifugal Fan

LRWB
Low Profile | Low Sound
Centrifugal Fan

These water saving eco-units offer improved dry operation on projects with indoor/ducted or confined layouts and low sound requirements.

eco-LSWE
Low Sound
Water Conserving
Centrifugal Fan
Increased Dry Cooling Capacity

eco-LRWB
Low Profile | Low Sound
Water Conserving
Centrifugal Fan
Increased Dry Cooling Capacity

ATWB Closed Circuit Cooler with optional Smart Shield Water Treatment System

COOLING TOWERS

AT Cooling Tower with optional features

Factory Assembled Induced Draft

EVAPCO's state-of-the-art induced draft cooling technology delivers superior operating advantages in any climate. From performance to maintenance, these solutions simply work harder. Choose from counterflow cooling towers, or crossflow and solar-powered options.

AT
Counterflow Cooling Towers

AXS
Crossflow Cooling Towers

SUN
Solar Powered Cooling Towers

Factory Assembled Forced Draft

These centrifugal fan cooling towers are utilized in low noise, high static, or ducted applications and are a good solution for tight enclosures.

LSTE
Low Sound Centrifugal Fan

LPT
Low Profile | Low Sound Centrifugal Fan

Modular Induced Draft

Designed in large modules for ease of installation and reduced field assembly, the AT Atlas is the most energy efficient modular cooling tower on the market.

AT ATLAS
Modular Induced Draft Counterflow

AT Atlas installation

CONDENSERS & GAS COOLERS

Dry & Adiabatic

Available in a wide range of footprints, motor types, control options and capacities, this complete line of Air Cooled/Dry & Adiabatic products offers unparalleled flexibility.

eco-Air Flat Series

Air Cooled Condenser
Or Gas Cooler

eco-Air V Series

Air Cooled Condenser
Or Gas Cooler

eco-Air Adiabatic Series

V Series Air Cooled Condenser
Or Gas Cooler with Adiabatic Pads

eco-Air Spray Series

V Series Air Cooled Condenser with
Adiabatic Spray System

Factory Assembled Induced Draft

EVAPCO condensers are equipped with low pressure drop and high capacity Thermal-Pak® II Coil design. The patented Ellipti-fin® coil technology further enhances our industry leading performance while saving on water consumption.

ATC-E

Advanced
Technology Series

eco-ATC-A

Water Conserving
Advanced Technology

eco-ATC-H

Optimum Wet/Dry
Hybrid Technology

PHC-E

Great for large industrial refrigeration projects, the PHC offers layout flexibility and reduced piping.

ATC-E Evaporative Condensers with optional external service platform

Factory Assembled Forced Draft

EVAPCO's forced draft product evaporative condenser lines are equipped with owner-oriented features and benefits for easier installation, maintenance, and operation! Multiple axial fans located at grade in the PMC-E offer redundancy and improved drive accessibility. While providing similar drive accessibility, the centrifugal fans in the LSC-E and LRC are suited for low noise or ducted applications

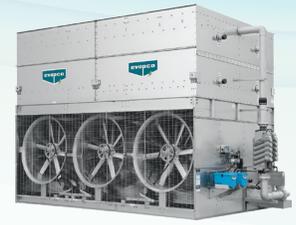

PMC-E
Low Power Axial Fan

LSC-E
Low Sound Centrifugal Fan

LRC
Low Profile | Low Sound
Centrifugal Fan

eco-PMC
Water Conserving Low Power
Axial Fan

The same features and benefits of the PMC line but utilizing patented Ellipti-fin® coil technology to offer water savings benefits.

PMC-E Evaporative Condenser with optional external service platform

SSTME Evaporator with long-throw adapter

Ceiling Hung Solutions

Enjoy industrial, low maintenance and easy-to-clean cooling in your food storage and processing facilities with EVAPCO's Superior Stainless Technology E-series evaporators, the only independently certified thermal performance and power rated offering available today.

SSTME
Medium Capacity
Unit Coolers

SSTHE
Reduced Charge Medium to
Large Hybrid Product Cooler

SSTLE
Large Capacity
Product Coolers

SSTXE
Low Profile
Unit Coolers

SSTWE*
Low Velocity Hygienic
Workroom Units

SSTDE*
Dual Coil Low Profile
Unit Coolers

*These models fall outside the scope of the AHRI Unit Coolers Certification Program but are rated in accordance with AHRI Standard 420.

Ultra Low Charge Designs

Complete with small diameter internally enhanced tubes, these evaporators are designed for applications where minimum refrigerant charge is of utmost importance.

SSTSE
Medium Capacity Unit Coolers

SSTEE
Low Profile Unit Coolers

Ultra Hygienic Ceiling Hung Solutions

Ultra Series Industrial Evaporators offer additional design features and accessibility for cleaning beyond those available in the standard SSTME and SSTWE product lines, making them the most hygienic ceiling-hung evaporators in the market.

U-SSTME
Medium Capacity
Unit Coolers

U-SSTWE*
Low Velocity Hygienic
Workroom Units

*This model falls outside the scope of the AHRI Unit Coolers Certification Program but are rated in accordance with AHRI Standard 420.

Custom Design Capabilities

We offer a broad range of unit configurations, engineering expertise and manufacturing capability to design and build virtually any type of non-cataloged custom coil or special unit.

Packaged Transcritical CO2 Refrigeration Systems

The flagship transcritical CO2 Purity line uses a variety of patented technologies to maintain optimal operation while providing high reliability. The Purity systems are available in low, medium and high temperature applications, serving both the commercial retail and industrial refrigeration markets. These systems also offer an efficient, environmentally friendly, and sustainable solution for cold storage facilities of all sizes and smaller industrial applications where previously, synthetic refrigerants may have been used. All EVAPCO LMP systems are designed and manufactured with simple installation and rapid commissioning in mind
